Objective

Production Planning & Control (PPC) Engineer with 6+ years of experience in structural rolling mill operations at Jindal Steel. Seeking a challenging role in a steel manufacturing organization where I can leverage my technical expertise and planning skills to improve operational efficiency, optimize resources, and contribute to the organization's growth and success.

Experience

Jindal Steel Raigarh

sep. 2019 -

Production planning Engineer

Present

Structural Rolling Mill (PPC & Logistics) :-

- Responsible for rolling schedule planning and production planning to achieve optimum mill utilization and on-time customer order fulfillment.
- Managed finished goods and raw material inventory in compliance with standard inventory norms.
- Coordinated with the Marketing team for production scheduling, customer order planning, and order execution.
- Resolved customer order-related queries and ensured timely delivery commitments.
- Planned and monitored dispatch activities for structural steel products.
- Worked on production planning, capacity planning, material flow, machine utilization, and time & motion studies.
- Coordinated with the Roll Shop to ensure roll readiness as per the rolling sequence plan.
- Managed SAP PP/MM activities including Material Master, MRP parameters, Bill of Materials (BOM), Work Centers, Routing, and Production Versions.
- Prepared and monitored production plans to maximize operational efficiency and minimize delays.
- Collaborated with Production, SMS, Logistics, Marketing, and Quality teams for smooth plant operations.
- Possess 6+ years of experience in Production Planning, PPC, Logistics Coordination, and Marketing Coordination in a Structural Rolling Mill.
